

Data Science Capstone

# I want to watch a movie...

Sprint 1

# A Movie Reccomender System

1

The Problem

2

The Opportunity

3

The Impact

# The Approach

1

## The Data

- 3 Tables: Movies, Users, and Ratings
- Over 11 million ratings

2

## Machine Learning

Use ML models to identify trends and similarities.

3

## Make it Personal

- Scrape Letterboxd data
- Leverage the value add

# Deep Dive on Impact

- Leverage Viewership
- Save Time
- Improved enjoyment
- RELAX

# Starring: Data

## Overview:

- 11 million plus observations
- 3 files
- 28 Columns

## Pros:

- Room to clean
- Personalization opportunity

## Cons:

- Do we have characteristics that will be strong indicators?
- Too big?

# Next Steps

- Clean & Trim
- Pre-process
- Continually Simplify
- Look ahead
- Scrape data
